

PRESS RELEASE

CodeTwo Public Folders Rated 5 Cows by Tucows

The application developed by CodeTwo, CodeTwo Public Folders, that is used to share data in Microsoft Outlook has been given the top rating by Tucows.com, one of the biggest and recognized software website catalogs in the world.

Wroclaw, Poland, Mar 18, 2009 --

"The top award for CodeTwo Public Folders is the proof that the product meets the highest world standards," says **Michał Bednarz**, the owner of CodeTwo, the only specialist in Poland to hold the title of **Microsoft MVP** for Microsoft Outlook.

All applications available from www.Tucows.com undergo strict review by Tucows experts. This is done on the basis of several criteria, such as the program's usefulness, friendliness, learning curve involved, innovative functionalities, customer care and technical support, program documentation etc. "In all these criteria our application received the highest rating and thus deserved the award i.e. the 5 Cows" says **Michał Bednarz**.

CodeTwo Public Folders enables you to share in Microsoft Outlook folders such as mail, contacts, calendars, Office documents, tasks with other users in the company or home network. The solution developed by **CodeTwo** automatically synchronizes all data between Microsoft Outlook clients in real time and on all machines connected to the network.

"Our program features the same functionalities in terms of data sharing in Outlook as Exchange Server," said Michał Bednarz." In this respect CodeTwo Public Folders is an alternative to the pricy Microsoft solution. It is an ideal program for small-sized businesses or company departments where employees share similar duties, for example Customer Helpdesks, Technical Support Centers, Accountancy. The application facilitates the document workflow, helps share tasks and use corporate resources economically.

For instance, the program can be used to share incoming electronic mail and indeed CodeTwo Public Folders is very popular with companies processing orders based on emails. CodeTwo Public Folders lets you easily distribute the work between employees so that customer service and transaction processing runs smoother and the jobs can be assigned to different people. At the same time all coworkers are aware of the work progress and who is working on what.

"Our application will also help you book resources of the company such as the company car," says **Michał Bednarz**. "The information related to car availability or occupancy will be visible for each employee who has access to the shared resource calendar in Outlook.

CodeTwo Public Folders will be of help to executives too. A shared calendar of a manager can be edited by the secretary at all times without sending email notifications. Appointments or business trips of the superior can be added, edited or deleted alike. All changes to the calendar, or other shared personal folder, are instantly visible for the sharing party, who can still make further amendments to the suggested agenda.

The application engineered by CodeTwo will be perfect for creating and keeping the company contacts database and a shared address book. *"By using the appropriate shared folders you can easily and conveniently create a company database that is always up-to-date and at hand for all the employees. This will ensure that all new contacts and details of customers and business partners are immediately available for the whole staff in the firm or selected department."* says **Michał Bednarz**.

The professional acclaim from TuCows.com is not the first prestigious award for **CodeTwo Public Folders**. In February 2009 the application was listed among the most popular Microsoft Outlook add-ons by www.MSExchange.org. The results of the poll will be published soon. MSExchange.org focuses on topics related to Microsoft Exchange, including Microsoft Outlook as the premier and most robust mail client for Exchange. The application was given 'Polish programmers award' by www.dobreprogramy.pl.

- **CodeTwo Public Folders in TuCows.com:**

- ability to work offline outside the network.

About the company:

CodeTwo, a software company located in Poland, develops highly-specialized software for Microsoft Exchange Server and Microsoft Outlook. CodeTwo offers solutions to facilitate groupwork in companies of all sizes as well as resource management procedures, mails and tasks.

The solutions brought by CodeTwo are currently used by over 2600 companies (660 in Poland and as many as 2000 worldwide, mainly the USA). The flagship applications released by CodeTwo include **CodeTwo Public Folders** – an application used to share Outlook data (calendars, contacts, tasks, and mail folders) by multiple users in the workplace or home, as well as **CodeTwo Exchange Rules** – a solution used to add company disclaimers or personalized signatures to email messages automatically without user's instruction. The product list is completed by customized software solutions (e.g. system used to manage employees' vacation/paid-leave forms, an application for creating data back-ups for Exchange, a solution for managing the standard paper company correspondence, and finally free add-ons to Microsoft Outlook.
