

PRESS RELEASE

CodeTwo Outlook Export Works With Microsoft Outlook 2010 x64

The 64-bit version of one of the most popular free Outlook add-ins, CodeTwo Outlook Export, was released by CodeTwo last week.

Jelenia Gora, Poland, June 16, 2010--

CodeTwo Outlook Export is a popular freeware used for exporting Outlook data to external CSV files. It extends the build-in Microsoft Outlook capability and exports also non-standard user-defined fields of the popular mail client, what is more it is far more easier to use. The update, versioned 1.2.6, has been tested compatible with Microsoft Outlook 2010 x64.

- We are happy to provide Outlook users with such a useful and popular freeware as CodeTwo Outlook Export - says Michal Bednarz, owner and Managing Director of CodeTwo – Since it has been well-received from the very beginning, we are constantly improving it to live up to our users' expectations. Now those who use Outlook 2010 x64 can benefit from our tool too.

CodeTwo Outlook Export users can easily export data from Outlook folders of all types, such as Contacts, Calendar, E-mail, Post, Tasks, Journal and Notes. After installing the program, the application icon appears in the Outlook ribbon and the export of user self-defined fields can start immediately. Users define what data they wish to export and under what name it should be displayed in the CSV file. The application significantly extends the build-in data export functionality of Microsoft Outlook and simplifies this process.

CodeTwo Outlook Export version 1.2.6 was also enriched with new data fields for contacts and messages what obviously means bigger export abilities than before. It is also now possible to read and save data fields to files on the local drive. What is more, the appearance of program icons was enhanced and the application now fully integrates with Microsoft Outlook 2010 ribbon.
