CodeTwo Releases New Version of its Exchange Rules 2010, Codetwo Exchange Rules 2010 1.1.0.

JELENIA GÓRA, Poland — April, 7th 2010 — CodeTwo today announced it will launch a new version of its application, CodeTwo Exchange Rules 2010, which works with Microsoft Windows Server® 2008 R2 to offer customers enhanced security, as well as innovative user interface features and reliability improvements. CodeTwo Exchange Rules 2010 enables centralized deployment of standardized disclaimers and signatures to e-mail send from all clients via Microsoft Exchange 2010. After several improvements, the new version of one of CodeTwo flagship software is now tested compatible with Windows Server® 2008 R2.

“Our ISV community is alive with innovation, and we’re committed to helping our partners drive the next generation of software experiences,” said Ross Brown, Vice President of ISV and Solutions Partners for the Worldwide Partner Group at Microsoft. “Adding compatibility for the latest Microsoft operating systems helps ISVs to stay ahead of the competition and give their customers access to cutting-edge technologies.”

“CodeTwo is excited to launch this new version of Exchange Rules 2010,” said Michal Bednarz, Managing Director at CodeTwo. “Making our application compatible with Microsoft helps us offer our customers compelling benefits, including sophisticated management features.”

The CodeTwo Exchange Rules 2010 did not require any major modifications to meet Microsoft Windows Server 2008 R2 tough prerequisites. After minor MSI adjustments it passed the demanding procedures of getting the prestigious “Microsoft Windows Server® 2008 R2” logo. CodeTwo Exchange Rules 2010 provides numerous working tools for managing unified and professional looking signatures attached to company e-mails send via Microsoft Exchange

2010. It allows to create attractive company footers and disclaimers that help to enhance the visual corporate identity of the company. At the same time, it helps to keep the company mail in keeping with current legal regulations.

CodeTwo, a software company located in Poland, develops highly-specialized software for Microsoft Exchange Server and Microsoft Outlook. CodeTwo offers solutions to facilitate groupwork in companies of all sizes as well as resource management procedures, mails and tasks.

The solutions brought by CodeTwo are currently used by over 4000 companies worldwide. The flagship applications released by CodeTwo include [CodeTwo Public Folders](#) – an application used to share Outlook data (calendars, contacts, tasks, and mail folders) by multiple users in the workplace or home, as well as [CodeTwo Exchange Rules](#) – a solution used to add company disclaimers or personalized signatures to email messages automatically without user's instruction. The product list is completed by customized software solutions (e.g. system used to manage employees' vacation/paid-leave forms, an application for creating data back-ups for Exchange, a solution for managing the standard paper company correspondence, and finally free add-ons to Microsoft Outlook.
