

PRESS RELEASE

CodeTwo Exchange Sync Voted MExchange.org Readers' Choice Award Winner - Second Runner-up

For more information about CodeTwo Exchange Sync, please contact CodeTwo Sales Department at info@codetwo.com. For more information about MExchange.org email info@msexchange.org

December 22, 2010 –

Leading Microsoft Exchange Server resource site, MExchange.org, announced today that CodeTwo Exchange Sync was selected the second runner-up in the Exchange Server administration category of the MExchange.org Readers' Choice Awards.

"Our Reader's Choice Awards give visitors to our site the opportunity to vote for the products they view as the very best in their respective category," said Sean Buttigieg, MExchange.org manager. "MExchange.org users are specialists in their field who encounter various solutions for Exchange Server at the workplace. Their vote serves as a solid peer-to-peer recommendation of the winning product."

MExchange.org conducts regular polls to discover which product is preferred by Exchange administrators in a particular category of third party solutions for Microsoft Exchange Server. The awards draw a huge response per category and are based entirely on the visitors' votes. MExchange.org users can submit their votes for the current Readers' Award poll in the site's left-hand bar.

About CodeTwo Exchange Sync

CodeTwo Exchange Sync is an advanced application that supports real-time data flow and synchronization between Exchange Server folders. The program enables automatic synchronization of selected Microsoft Exchange server folders, containing all sorts of data: Outlook mail, calendar, contacts, tasks items etc. It will also give you the possibility to synchronize mobile devices with Public Folders in Exchange Server.

CodeTwo Exchange Sync allows you to use several types of synchronization tasks suited to a specified group of Exchange Server users. The replication of data can be executed using the one-way synchronization, in which the data is transferred in one direction from the source to the target folders, or Two-way that propagates data in two directions between a group of folders.

CodeTwo Exchange Sync enables a better control of data flow between Exchange folders. The built-in filters let the administrator define precisely which data has to be synchronized between them. In addition, the synchronized folders can be modified and synchronized on the fly.

About MExchange.org

MExchange.org (<http://www.msexchange.org>) is a Microsoft Exchange Server 2007/2003/2000 resource site. It is the leading Exchange site, attracting over 350,000 Exchange administrators and specialists a month.
