

PRESS RELEASE

## CodeTwo Outlook Reply All Reminder – always reply to all recipients in Outlook

CodeTwo programmers have disclosed a new free tool for Microsoft Outlook users. It reminds to reply to all recipients included in the conversation and helps to avoid skipping significant addressees while replying to group emails in Outlook.

Jelenia Gora, Poland, September 29th, 2011–

When you respond to emails sent also to a group of recipients in the CC field, you often forget to include all participants of the conversation in the message. Mail clients don't prompt users natively to use the "Reply All" option whenever they forget to do that. Luckily, Microsoft Outlook users have just gained a smart free tool, which fills this gap. The program is called CodeTwo Outlook Reply All Reminder and by far it is the 11th free Outlook add-in released by CodeTwo on their website.

*– Here at CodeTwo, we use Microsoft Outlook on a daily basis. Although it is already a highly developed product, we exactly know where the gaps are and how it still can be improved. To cut a long story short, CodeTwo Outlook Reply All Reminder, as well as our other solutions, stemmed from needs of users and ourselves. – says Michal Bednarz, CodeTwo Managing Director.*

CodeTwo Outlook Reply All Reminder is a typical install-and-forget application. Once it is installed on the computer equipped with Microsoft Outlook, it starts to work in background right away. It requires absolutely no configuration. Whenever you forget to hit the "Reply All" button while replying to a message sent to multiple recipients, you will be asked whether to include the rest of the recipients in the message or not. You can choose to send this message anyway, add other addressees or hold the program back from sending this email.

CodeTwo Outlook Reply All Reminder became the 11th member of the rich Microsoft Outlook-dedicated family of CodeTwo programs. Just a couple of weeks ago another useful Outlook plugin by CodeTwo, CodeTwo Outlook Attachment Reminder had its premiere. It reminds users about attaching files to messages that contain specific phrases, e.g. attach, attachment, see attached, etc. Despite free tools, CodeTwo is the author of CodeTwo Public Folders and CodeTwo Outlook Sync. These two award-winning, cost-effective solutions enable easy data synchronization between two or many PCs equipped with Microsoft Outlook.

All free and paid Outlook add-ins by CodeTwo are available on the company's official website [www.codetwo.com](http://www.codetwo.com).

### About CodeTwo:

CodeTwo, a software company located in Poland, develops highly-specialized and award-winning software for Microsoft Exchange Server and Microsoft Outlook. CodeTwo offers solutions that facilitate group work, e-mail administration and data synchronization in organization. The programs brought by CodeTwo are currently used by over 10,000 companies worldwide. The flagship solutions released by CodeTwo include CodeTwo Public Folders - used to share Outlook data (calendars, contacts, tasks, and mail folders) by multiple users; CodeTwo Exchange Rules Pro - a sophisticated email management tool that boost the standard mechanism of email rules in Exchange and simplifies the process; CodeTwo Exchange Rules - a robust e-mail auto-signature and disclaimer software; as well as CodeTwo Exchange Sync that ensures an automatic synchronization of Exchange folders and allows users to access them from mobile devices. The product list is extended with free, popular add-ins designed for Microsoft Outlook users.

In 2011 CodeTwo achieved the Gold Independent Software Vendor (ISV) competency. This is the highest rank a company creating its own applications can receive among Microsoft Partners. It means CodeTwo's products are recognized by Microsoft for the highest quality, reliability and innovation in the specific business solution area.
